The committee reviewed current progress on outreach activities in support of the upcoming ALCTS ALA Annual Program, namely the data collected to date and a list of potential new outreach groups.

The committee discussed completed outreach interviews which are posted on <http://metaware.buzz>, including key findings (e.g. distributed authorities, accessible metadata needs, national authentication/authorization for NLS (National Library Service), potential role of aggregated LD services like VIAF – key focus on language as a mechanism for inclusivity).

Decision was made to follow up with Chris Carr (who made metadata field proposal to MARC advisory committee and who is from the Canadian Committee on Metadata Exchange) to think about the language in which a standard is represented.

Discussed Potential for publication of analyzed results in ITAL or LRTS, following the ALCTS ALA Annual Program.

Discussed the ALCTS ALA Annual Program (“How metadata enables or inhibits discovery and access to diverse communities and concepts”) to confirm presenters, topic, scope, and questions for the panel. Michael Bolam will replace Erik Mitchell as one of the main presenters. The marketing plan under consideration is to

target; (1) the Metadata interest group from ALCTS (sponsor in name only) (<http://www.ala.org/alcts/mgrps/ig/ats-nrmc>) to see if we can get a blog post on their blog and announce on the program; (2) the ALCTS/LITA Linked library data interest group ((<http://www.ala.org/lita/about/igs/linked/lit-iglld>); and (3) the Cataloging research interest group (<http://www.ala.org/alcts/mgrps/camms/grps/ats-ccsdgcatr>).
