New edition of "Statistics Checklist" published

The second edition of "Statistics Checklist" has been published by the Library Administration and Management Association (LAMA) Statistics Section.

First published in 1984, the updated version is edited by Rodger S. Harris for the SS Data Collection for Library Managers Committee.

The publication is designed to be used as an aide in evaluating the capacity of automated systems to collect standardized data. It provides a checklist for most of the commonly used library statistics relative to staff, budget and collections. Space is provided for the user to add additional categories. An appendix suggests further subdivisions for many of the data categories and a glossary defines the terms used in the Checklist according to the ANSI Z39.7 Standard.

"Statistics Checklist" (ISBN 0-8389-7668-9) is available for \$8.50 (\$7 for LAMA members) from: American Library Association (ALA), Order Department, 50 E. Huron St., Chicago, IL 60611. Telephone: 800-545-2433. ext. 5108.

LAMA is a division of the American Library Association.
