

Report of the Web Resources for the Rare Materials Cataloger Editorial Group
June 2023 BSC Annual Meeting
Presented by Tammy Druash, Web Resources editor

1. Link maintenance is still underway on a bimonthly basis, and we are continuing to troubleshoot broken links when they are found, and keeping track of broken links that will need to be revisited.
2. From 2022-2023 there were 32 broken links, of which 10 were removed and 18 were resolved.
3. There are 4 broken links that are temporarily down according to the host website so we're keeping an eye on those and hope to have updated links soon.
4. Two new resources have been added: [Pictorial Cloth Bindings](#) from the University of Florida, and the [Purdue Paleography Project](#) which includes tutorials on scripts and variations in letter forms
5. We are still working on applying the editorial guidelines to existing citations
6. We are continuing to accept suggestions for new resources to add, either via direct email to myself (t.druash@unf.edu) or by visiting the Web Resources site and clicking on "contact us" in the menu
