Hybrid teams for hybrid archives:

Collaboration and born-digital archives

Laura L. Carroll
Erika Farr
Emory University

Rushdie @ Emory

Hoppiness; behind all her worrying at tiple, screet obing at its scabs, was the pure, unalloyed jay of love.

An Overview

An Overview

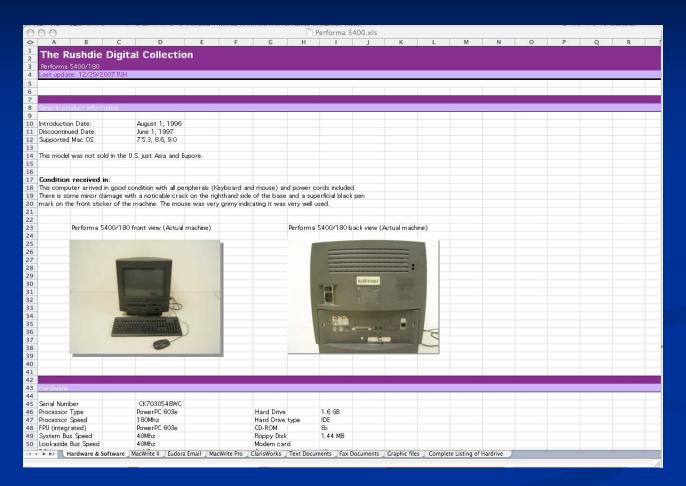

Instead . . .

- Taking a human perspective on the work
- Hybrid team for a hybrid archive
- Collaboration and professional exchange

Incoming

Now what?

- Working group (BoDAR)
- Engage the archives and digital systems
 - Three from each
- Range of expertise
- Understanding roles and responsibilities

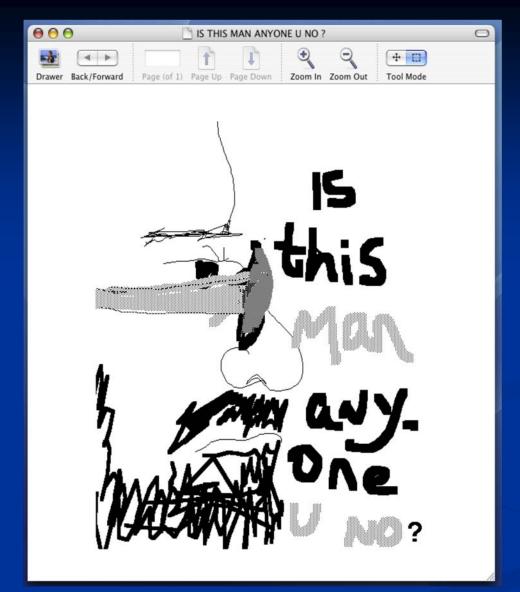

Setting goals

- Respecting the hybrid nature of the collection
- Balancing donor privacy and researcher needs
- Providing authentic research experiences

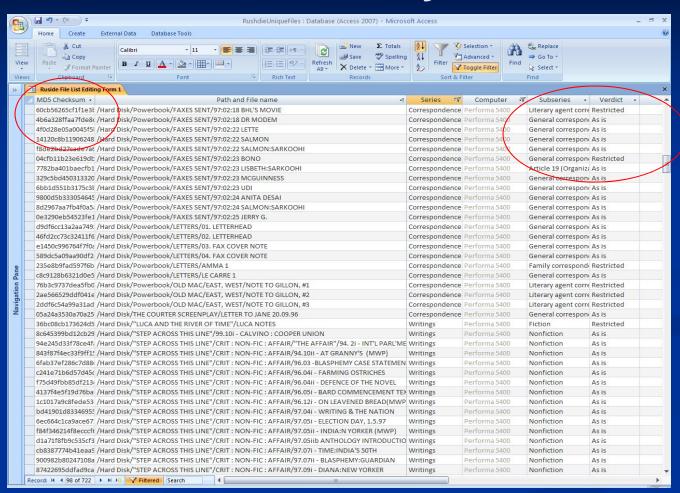

"Verdict"

- AS IS can be released as is for both the emulation environment and the searchable text interface
- REDACTION will need to be redacted for access;
 will not be available for emulation environment, but
 will be for searchable text interface
- RESTRICTED no access in either environment
- EMULATION ONLY will only appear in the virtual environment and not go into the searchable text interface (e.g. files named "Format," but that have no actual content once you open them up).

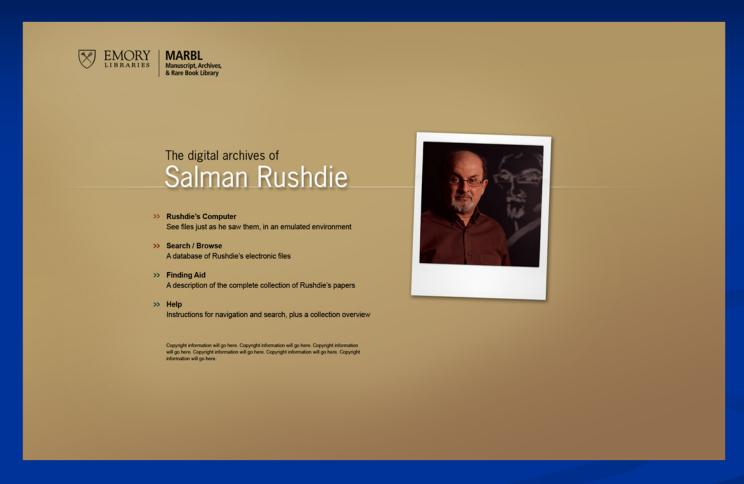

Case Study #1

Case Study #2: Researcher Access

1

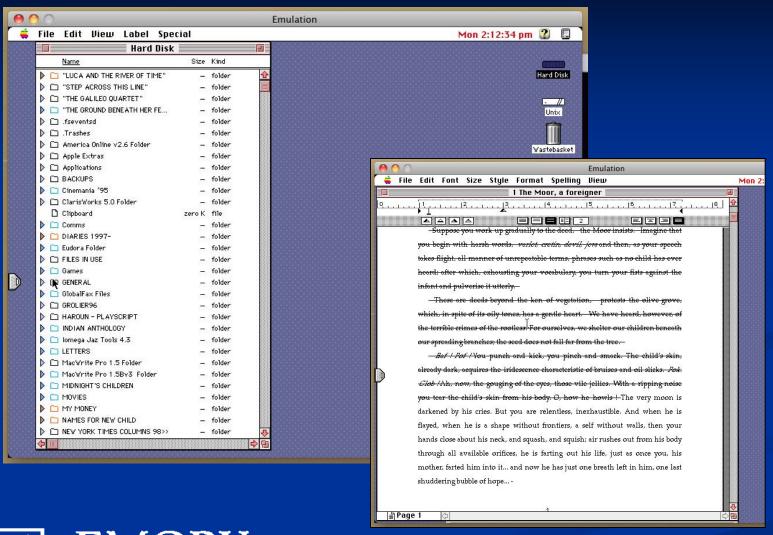

Modes of Access

- Two-fold approach to researcher access
 - Emulated environment
 - Complete digital context
 - Archival sleuthing
 - Searchable database
 - More familiar technology
 - Search and browse

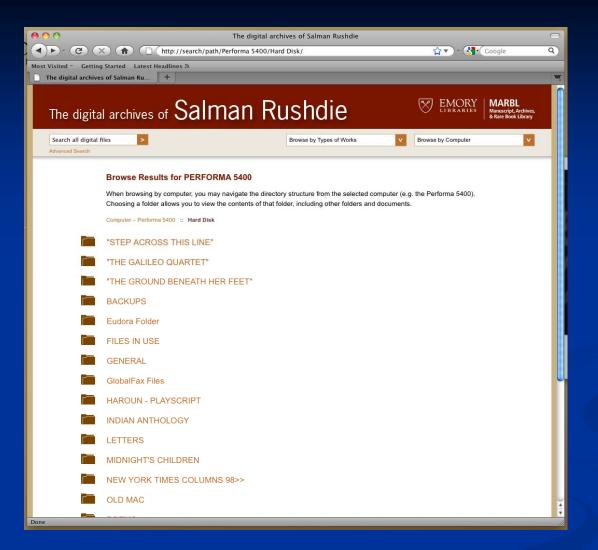

Performa 5400: Emulation

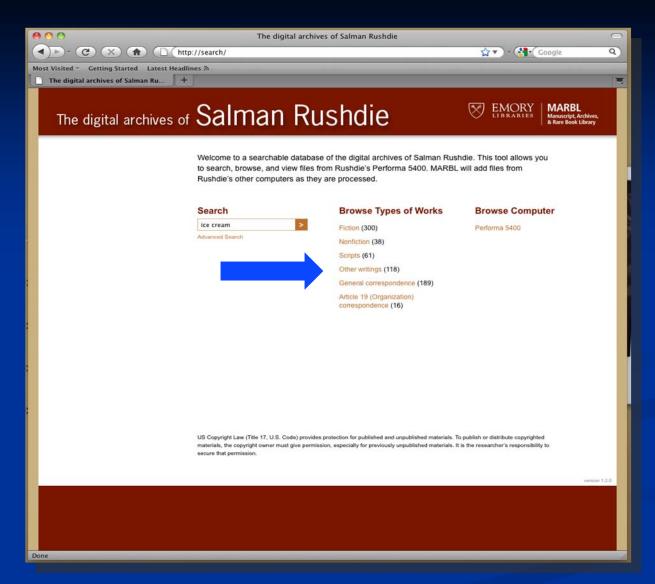

Emory Findings

- What did not work
 - Some processes and hand-offs
 - Need broader shared understanding

Emory Findings

- What worked
 - Diverse mix of professionals
 - Regular meetings
 - Shared vision
 - Ongoing exchange of ideas and perspectives

╢

In closing

Thank you.

Laura (Ilcarro@emory.edu) Erika (elfarr@emory.edu)
