Introducing Triples

Nodes and Links

- Quite simply: Subject, Predicate, Object
- gives us the ability to describe entities in a way that is machine readable

What do we know about the person:

Ed Summers (aside from the fact that he rocks)?

Triples for machines

- Triples can be serialized in many different ways, including **Resource Description Framework,** RDF/XML, RDFa, N3, Turtle, etc, but they all describe things in the **<subject><predicate><object>** format.
- Of course, we need to be **consistent** and **predictable** for machines to understand us.
