Embracing the WORLD GRANT IDEAL:
Affirming the Morrill Act for a Twenty-first-century Global Society

Committed to the core values of quality, inclusion, and connectivity that made land-grant universities among the best in the world, Michigan State University President Lou Anna K. Simon considers how these values can be adapted to address individual, societal, and economic challenges for sustainable global prosperity in the twenty-first century.

Her monograph, Embracing the World Grant Ideal: Affirming the Morrill Act for a Twenty-first-century Global Society, provides insight into how all universities can align themselves more effectively to advance the public good and shape the changes that
The Importance of Foot Health

Until the establishment of a formal education system for veterinarians, much of the care of horses fell to farriers. Farriers combined the skills of a blacksmith with those of a veterinarian. And were not only trained how to shoe horses, but also how to administer various home remedies and treatments for lameness and other medical problems. Farmers were required to have a good understanding of the nuances of an equine foot.

Many of the works published by farmers were often designed to pocket manuals, small and easy to transport as the farmer traveled from farm to farm. In addition to images and descriptions of treatments they often included recipes for the farmer's own secret vices.
