

I. OVERVIEW

I.16.2 Change in Review Dates

COA will consider requests to change a comprehensive review date: 1) in order to coordinate the ALA review with an institutional, regional, or other specialized review; or, 2) in extreme circumstances. Written requests for changes must be sent to the COA at least two (2) years before the scheduled review or as soon as possible following an emergency. The COA will consider the request at its next regularly scheduled meeting. Any COA decision to change a review date is based on the total COA workload. Deferrals must be consistent with the Committee's obligation to assure the public and the profession that the accredited status of a program reflects current and accurate information.
