The profit the net system enables booksellers to make on net books is so great that some now supply non-net books at cost, looking to net books for profit. Of course no bookseller will do this unless assured of a stated proportion of net orders. It may, in some instances, be to a library's advantage to buy some net books rather than none at all. See your bookseller about this.

Address inquiries and suggestions to Arthur E. Bostwick, chairman, 226 West 42nd St., N. Y.
